OUR FLEET OFFER

All tracked excavators above 10 tonne are supplied complete with:

- Security tracking devices
- Vandal Guards
- Miller Quick Hitch
- Overload warning devices

We are also one of the few plant hire companies nationally that have achieved accreditation to the following International Standards:

We endeavour to provide our customers with the highest levels of service at all times.

We specialise in excavators, both operated and self-drive

We are a family business which has been trading since 1969. We operate one of the largest excavator fleets in the East Midlands with a policy of renewing our machines every three years. All our equipment is subject to thorough safety inspections and regular planned maintenance. Our team of fully qualified service engineers are ready to respond promptly to any service requirements.

We believe we have a competitive advantage in the following areas:

- ◆ The quality of our fleet
- ◆ The quality of our operators
- ◆ Efficient site call out

We have the ability to ensure that your plant requirements are supplied on time, to the right location, to the correct specification and at a competitive price.

We do this by continually re-investing in the latest machines, by supplying highly skilled operators, and by providing an efficient back-up service with fully trained mechanics on hand to ensure that any downtime on the equipment that you have on hire is minimised.

Our equipment is available with a fully trained operator, or on a self-drive basis. The majority of our operators also hold a “Gas Passport” which means that they are qualified to work next to live gas mains.

All operators hold a CPCS certificate of Training Achievement. All plant machinery is available on an Operated or Self-drive basis. All plant machinery is offered for hire under CPA Model Terms & Conditions, copies of which are available on request.
